

Allomatic Friction Plates

Allomatic friction clutch plates are designed, manufactured and tested with attention to every detail, from the production of raw materials to final assembly. Thousands of hours of research and dynamometer testing are applied to ensure that our friction plates perform to their utmost in every application. Allomatic friction plates give you superior resiliency, smoother engagement and superior shifting, providing longer clutch life.

FEATURES & BENEFITS

Superior shift feel and performance

Smoother engagement characteristics

Improved clutch life

Reduced debris contamination

Increased energy loading capacity

Durability under tough conditions

MADE IN THE USA
