

Allomatic Filters

Allomatic transmission filters are designed and engineered to meet or exceed OEM requirements and perform consistently. Offering both domestic and import filter applications, Allomatic filters include a variety of plastic, metal and composite filters. We are also proud of the strategic alliance we have with OE filter manufacturer, Filtertek. Their filters are patented and guaranteed to be 100% sealed--never to leak and their OE-quality media filtering stops particles and debris to 60 microns. Filtertek's quality standard is QS 9000 certified.
