

TESTING PROVES ALLOMATIC FRICTION PLATES SUPERIOR TO COMPETITION

Allomatic friction plates clearly superior in standard OEM industry automotive durability tests to new friction plates from China.

- SAE (society of automotive engineers) standard OEM friction plate durability test.
- Test used by automotive OEM's as part of their required testing.
- Allomatic friction plates with both standard and high energy materials **Pass** durability test.
- New friction plates from China **Fail** standard automotive OEM durability test.
- All Allomatic friction plates are designed, manufactured and test validated to meet automotive OEM durability requirements.
